AGENDA

REDCap Introduction

Who Created REDCap and Who Uses it?

THEN

2004: Developed at Vanderbilt Univ.
2006: Global consortium started

2014: Monash joined

NOW

Worldwide:
+3690 institutions /131 countries
+765,000 projects
+1,000,000 users

REDCap @ Monash:
+500 projects
+2000 users

What is REDCap?

Web-based software used to create and manage research databases and/or participant surveys.

Developed as a tool to help researchers collect and manage data effectively and responsibly.

Advantages of REDCap

Accessible

- web-based access (on and off campus)
- access for multi-site collaborations

Customisable

- fast and flexible to design
- modifications at anytime

Accurate

- ensures consistent and accurate data entry
- data quality checks to look for errors

Secure

- Data are stored in a secured area
- Daily backup and software upgrades

Supported

- includes user group, training, design guidance, troubleshooting

Training Topics

Project Setup

- Main Project Settings
- Design your data instruments
- Enable modules and customisations
- User Rights and Permissions
- Testing your project
- Moving to production

Using Surveys

- Enabling surveys
- Settings & customisations
- Public link vs private links

Training Topics

Applications & Tools

- Record status dashboard
- Project audit trail
- Field history
- Codebook
- Data export
- Data import
- Data quality

Demo project

MONASH University

Welcome to REDCap!

REDCap is a secure web platform for building and managing online databases and surveys. REDCap's streamlined process for rapidly creating and designing projects offers a vast array of tools that can be tailored to virtually any data collection strategy.

REDCap provides automated export procedures for seamless data downloads to Excel and common statistical packages (SPSS, SAS, Stata, R), as well as a built-in project calendar, a scheduling module, ad hoc reporting tools, and advanced features, such as branching logic, file uploading, and calculated fields.

Learn more about REDCap by watching a [brief summary video \(4 min\)](#). If you would like to view other quick video tutorials of REDCap in action and an overview of its features, please see the [Training Resources](#) page.

NOTICE: If you are collecting data for the purposes of human subjects research, review and approval of the project is required by your Institutional Review Board.

If you require assistance or have any questions about REDCap, please contact [support](#).

REDCap Features

- Build online surveys and databases quickly and securely** - Create and design your project rapidly using secure web authentication from your browser. No extra software is required.
- Fast and flexible** - Conception to production-level survey/database in less than one day.
- Export data to common data analysis packages** - Export your data to Microsoft Excel, PDF, SAS, Stata, R, or SPSS for analysis.
- Ad Hoc Reporting** - Create custom queries for generating reports to view or download.
- Scheduling** - Utilize a built-in project calendar and scheduling module for organizing your

REDCap 8.10.15 - © 2019 Vanderbilt University

MONASH University

Step 1: Main Project Settings

The screenshot shows the 'Main project settings' section. At the top left is a red 'X' icon with the text 'Not started'. Below it is a button labeled 'I'm done!'. To the right are two enable/disable buttons: 'Enable Use surveys in this project?' and 'Enable Use longitudinal data collection with defined events?'. A video link 'VIDEO: How to create and manage a survey' is also present. The top navigation bar includes 'Project Home', 'Project Setup' (selected), 'Other Functionality', and 'Project Revision History'. The status bar at the bottom indicates 'Completed steps 0 of 7'.

Step 1: Main Project Settings

The screenshot shows the 'Main project settings' section. At the top left is a green checkmark icon with the text 'Complete!'. Below it is a button labeled 'Not complete?'. To the right are two enable/disable buttons: 'Enable Use surveys in this project?' and 'Disable Use longitudinal data collection with defined events?'. A video link 'VIDEO: How to create and manage a survey' is also present. The top navigation bar includes 'Project Home', 'Project Setup' (selected), 'Other Functionality', and 'Project Revision History'. The status bar at the bottom indicates 'Completed steps 1 of 8'.

Step 2: Online Designer

The screenshot shows the REDCap Project Home interface. At the top, there are tabs for 'Project Home', 'Project Setup', 'Other Functionality', and 'Project Revision History'. Below the tabs, the 'Project status' is listed as 'Development' with 'Completed steps 1 of 8'. The main content area has two sections: 'Main project settings' (with a 'Complete!' icon) and 'Design your data collection instruments' (with a 'Not started' icon). A large black arrow points from the text 'Add or edit fields on your data collection instruments...' in the second section towards the 'Online Designer' button. At the bottom right, the Monash University logo is visible.

Step 2: Online Designer

The screenshot shows the REDCap Online Designer interface. At the top, there are tabs for 'Project Home', 'Project Setup', 'Online Designer' (which is highlighted), and 'Data Dictionary'. Below the tabs, there are buttons for 'Create snapshot of instruments' and 'VIDEO: How to use this page'. The main content area is titled 'Data Collection Instruments' and contains a table for managing instruments. The table has columns for 'Instrument name', 'Fields', 'View PDF', and 'Instrument actions'. One row is shown with the instrument name 'My First Instrument', field count '1', and a 'Choose action' dropdown. The Monash University logo is at the bottom right.

Step 2: Online Designer

The screenshot shows the REDCap Online Designer interface. At the top, there are tabs for Project Home, Project Setup, Online Designer (which is selected), and Data Dictionary. Below the tabs, there are buttons for creating a snapshot of instruments, viewing a video tutorial, and taking a last snapshot. The main content area is titled "Data Collection Instruments". It features a section for adding new instruments with options to Create, Import, or Upload. A table lists existing instruments: Demographics (1 field, choose action), Diagnosis (0 fields, choose action), and Simple Questions (0 fields, choose action). The bottom right corner of the page displays the Monash University logo.

Step 2: Online Designer

The screenshot shows the REDCap Online Designer interface with the "Add New Field" dialog box open. The dialog box has a title bar with "Add New Field" and a close button. Below the title bar, there is a note: "You may add a new project field to this data collection instrument by completing the fields below and clicking the Save button at the bottom. When you add a new field, it will be added to the form on this page. For an overview of the different field types available, you may view the [Field Types video \(4 min\)](#)". A list of field types is provided, including: Text Box (Short Text, Number, Date/Time, ...), Notes Box (Paragraph Text), Calculated Field, Multiple Choice - Drop-down List (Single Answer), Multiple Choice - Radio Buttons (Single Answer), Checkboxes (Multiple Answers), Yes - No, True - False, Signature (draw signature with mouse or finger), File Upload (for users to upload files), Slider / Visual Analog Scale, Descriptive Text (with optional Image/Video/Audio/File Attachment), and Begin New Section (with optional text). A red arrow points to the "Add New Field" button in the dialog box. The background shows the REDCap interface with a "Record ID" field and a note about it being uneditable.

Step 2: Online Designer

This page allows you to build and customize your existing ones. New fields may be added by clicking the **Edit** icon. If you decide that you do not want to keep fields, simply **drag and drop** a field to a different location and it will take effect immediately in real time.

[Return to list of instruments](#)

Current instrument: **Demographics**

Record ID
Variable: record_id

NOTE: The field above is the record ID field and thus cannot be deleted or moved. It can only be edited.

Add New Field

Field Type: Text Box (Short Text, Number, Date/Time, ...)

Field Label: First Name

Variable Name (utilized in logic, calcs, and exports): first_name

Validation? (optional): None

Required?* Yes No

Identifier? Yes No

Custom Alignment: Right / Vertical (RV)

Field Note (optional):

Save Cancel

Step 2: Online Designer

Record ID
Variable: record_id

NOTE: The field above is the record ID field and thus cannot be deleted or moved. It can only be edited.

Add Field Add Matrix of Fields

First Name
Variable: first_name
* must provide value

Add Field Add Matrix of Fields

Last Name
Variable: last_name
* must provide value

Add Field Add Matrix of Fields

DOB
Variable: dob
* must provide value

Add Field Add Matrix of Fields

Gender
Variable: gender
* must provide value

Male
Female

Add Field Add Matrix of Fields

Email
Variable: email
* must provide value

Step 2: Edit/Copy/Move/Delete Fields

The screenshot shows a software interface for managing form fields. At the top, there are four icons: a pencil (Edit), a blue folder (Copy), a green arrow (Move), and a red X (Delete). These icons are highlighted with a red border. Below them, the text "Variable: first_name" is displayed. The field itself is labeled "First Name" with a note "* must provide value". To the right of the field is a large empty text input box.

Step 2: Branching Logic

The screenshot shows a software interface for managing branching logic. At the top, it says "Current instrument: Diagnosis" and "Preview instrument". There are two main sections:

- Comorbidities**: A section labeled "Comorbidities" with a note "* must provide value". It contains a list of checkboxes for comorbidities: Diabetes, Renal Insufficiency, Myocardial, Other, and None of the above.
- If Other, please specify**: A section labeled "If Other, please specify" with a note "* must provide value". It features a large empty text input box for entering additional information.

At the bottom of each section are "Add Field" and "Add Matrix of Fields" buttons.

Add/Edit Branching Logic

Branching Logic may be employed when fields/questions need to be hidden under certain conditions. If branching logic is defined, the field will only be visible if the conditions provided are true (i.e. show the field only if...). You may specify those conditions in the text box below for the Advanced Branching Logic Syntax or by choosing the Drag-N-Drop Logic Builder method, which allows you to build your logic in a much easier fashion by simply dragging over the options you want. You may switch back and forth between each method if you wish, but please be aware that since the advanced logic allows for greater complexity, it may not be able to be switched over to the Drag-N-Drop method if it becomes too complex.

Choose method below for the following field: **comorb_other** - *If Other, please specify*

Advanced Branching Logic Syntax How to use [Branching Logic](#) [Smart Variables](#)

Show the field ONLY if...
[comorb(4)] = '1'

[Clear logic](#)

Test logic with a record: [select record](#)

Step 2: Piping

Without Data

Record ID	2
Patient	<input type="text"/>
Comorbidities	<input type="checkbox"/> Diabetes <input type="checkbox"/> Renal Insufficiency <input checked="" type="checkbox"/> Myocardial <input type="checkbox"/> Other <input type="checkbox"/> None of the above

With Piping Data

Patient	John Doe 02-10-1989
Comorbidities	<input type="checkbox"/> Diabetes <input type="checkbox"/> Renal Insufficiency <input checked="" type="checkbox"/> Myocardial <input type="checkbox"/> Other <input type="checkbox"/> None of the above

Step 2: Piping

First Name
* must provide value

Last Name
* must provide value

DOB
* must provide value

Edit Field

You may add a new project field to this data collection instrument by completing the fields below and clicking the Save button at the bottom. When you add a new field, it will be added to the form on this page. For an overview of the different field types available, you may view the [Field Types video \(4 min\)](#).

Field Type: Begin New Section (with optional text)

Field Label: Patient: [first_name] [last_name] [dob]

The diagram illustrates the mapping of variables from the data entry fields to a new field label. Blue arrows point from the 'Variable' labels ('first_name', 'last_name', 'dob') in the top three rows to the corresponding fields in the 'Edit Field' panel. A red arrow points from the 'Field Label' input field in the 'Edit Field' panel back to the 'Patient:' label.

Step 2: Matrix Field

Current instrument: Simple Questions

[Preview instrument](#)

Add Field Add Matrix of Fields

Matrix group: question_6

These questions are about how you feel and how things have been with you during the past 4 weeks. For each question, please give the one answer that comes closest to the way you have been feeling. How much of the time during the past 4 weeks...

Variable: calm

	All the time	Most of the time	Some of the time	A little of the time	None of the time
a. Have you felt calm and peaceful? * must provide value	<input type="radio"/>				

reset

Variable: energy

	All the time	Most of the time	Some of the time	A little of the time	None of the time
b. Did you have a lot of energy? * must provide value	<input type="radio"/>				

reset

Variable: depressed

	All the time	Most of the time	Some of the time	A little of the time	None of the time
c. Have you felt downhearted and depressed? * must provide value	<input type="radio"/>				

reset

Add Field Add Matrix of Fields

Edit Matrix of Fields

You may add or edit a matrix (i.e. grid) of project fields on this data collection instrument by completing the fields below. By providing all necessary info below and clicking Save, the new matrix of fields will be added to the form on this page. A Field Label and Variable name must be provide for each field in the matrix, and you must also set the Choices (i.e. matrix column headers) and answer format (Single Answer vs. Multiple Answers) for the entire matrix. [View a matrix example](#) or [Read more about matrix fields on the Help & FAQ](#).

Matrix Header Text (optional)

These questions are about how you feel and how things have been with you during the past 4 weeks. For each question, please give the one answer that comes closest to the way you have been feeling. How much of the time during the past 4 weeks... [Expand](#)

Matrix Rows

Each row represents a different field with its own label and variable name.

Field Label	Variable Name	Required?	Field Annotation
a. Have you felt calm and peaceful?	calm	<input checked="" type="checkbox"/>	X
b. Did you have a lot of energy?	energy	<input checked="" type="checkbox"/>	X
c. Have you felt downhearted and depressed?	depressed	<input checked="" type="checkbox"/>	X

[Add another row](#)

Matrix Column Choices

Choices (one choice per line)

4. All the time
3. Most of the time
2. Some of the time
1. A little of the time
0. None of the time

[How do I map my code to the choices?](#)

Other Matrix Info

Answer Format: Single Answer (Radio Buttons) ▾

Ranking: What is a ranked matrix of fields?
 Allow only 1 choice to be selected per column (radio buttons only)

Matrix group name: ONLY letters, numbers, and underscores question_6 [What is a matrix group name?](#)

Step 2: Matrix Field

Step 2: Data Dictionary: Bulk Edit

Design your data collection instruments

Add or edit fields on your data collection instruments. This may be done by either using the Online Designer (online method) or by uploading a Data Dictionary (offline method). Quick links: [Download PDF of all instruments](#) OR [Download the current Data Dictionary](#).

Go to [Online Designer](#) or [Data Dictionary](#) Explore the [REDCap Shared Library](#)

Have you checked the [Check For Identifiers](#) page to ensure all identifier fields have been tagged?

Learn how to use [Smart Variables](#) [Piping](#) [Action Tags](#)

[Project Home](#) [Project Setup](#) [Online Designer](#) [Data Dictionary](#)

[VIDEO: How to use this page](#)

This module will allow you to create new data collection instruments/surveys, or edit existing ones. Changes may be made by either using the [Online Designer](#) or [Upload Data Dictionary](#) (see tabs above), in which you may use either method or both. The Online Designer may help you get some initial fields/forms built quickly or to make quick edits; but using the Data Dictionary may be more helpful if you will be adding a large number of fields for this project.

This module may be used for making changes to the project, such as adding new fields or modifying existing fields, by using an offline method called the Data Dictionary. The Data Dictionary is a specifically formatted CSV (comma delimited) file within which you may construct your project fields and afterward upload the file here to commit the changes to your project.

Click the 'Browse' or 'Choose File' button below to select the file on your computer, and upload it by clicking the 'Upload File' button. Once your file has been uploaded, changes will NOT immediately be made but will be displayed and checked for errors to ensure that all the formatting in your Data Dictionary is correct before official changes are made to the project. **Snapshot note:** A snapshot of your project's current Data Dictionary will be created automatically during the Data Dictionary upload process before committing the new Data Dictionary. The snapshot can later be accessed and downloaded from the Project Revision History page.

Need some help?
If you wish to view an example of how your Data Dictionary may be formatted, you may download the [Data Dictionary demonstration file](#), or you may view the [Data Dictionary Tutorial Video \(10 min\)](#). For help setting up your Data Dictionary, you may also see the instructions listed on the [Help & FAQ](#).

Steps for making project changes:
1. [Download the Current Data Dictionary](#) [VIDEO: How to create and manage a survey](#)
2. Edit the Data Dictionary (see the [Help & FAQ](#) for help)
3. Upload the Data Dictionary using the form below
4. The changes will be made to the project after the Data Dictionary has been checked for errors

Upload your Data Dictionary file (CSV file format only)
Format for min/max validation values for date and datetime fields: DD/MM/YYYY or YYYY-MM-DD •
[Choose file](#) No file chosen
[Upload File](#)

Step 3: Define Events

[Project Home](#) [Project Setup](#) [Other Functionality](#) [Project Revision History](#)

Project status: Development Completed steps 2 of 8

Main project settings

Complete! [Not complete?](#) [Enable](#) [Disable](#) [Use surveys in this project?](#) [VIDEO: How to create and manage a survey](#) [Use longitudinal data collection with defined events?](#) [Modify project title, purpose, etc.](#)

Design your data collection instruments

Complete! [Not complete?](#) Add or edit fields on your data collection instruments. This may be done by either using the Online Designer (online method) or by uploading a Data Dictionary (offline method). Quick links: [Download PDF of all instruments](#) OR [Download the current Data Dictionary](#). Go to [Online Designer](#) or [Data Dictionary](#). Explore the [REDCap Shared Library](#). Have you checked the [Check For Identifiers](#) page to ensure all identifier fields have been tagged? Learn how to use [Smart Variables](#), [Piping](#), [Action Tags](#).

Define your events and designate instruments for them

In progress [I'm done!](#) Create events for re-using data collection instruments and/or set up scheduling. Go to [Define My Events](#) or [Designate Instruments for My Events](#).

Step 3: Define My Events

[Project Setup](#) [Define My Events](#) [Designate Instruments for My Events](#)

This application allows you to define 'events' for your project that allow for the **utilization of data collection forms multiple times for any given project record** (often used when collecting longitudinal data). An 'event' may be a temporal event in the course of your project, such as a participant visit or a task to be performed. After events have been defined, you will need to designate the data collection instruments that you wish to utilize for any or all events, thus allowing you to use a form for multiple events for the same project record. You may **group your events into 'arms'**, in which you may have one or more arms/groups for your project. Each arm can have as many events as you wish. You may use the table below to create new events and/or arms, or modify existing ones. (One arm and one event will be initially defined as the default for all projects.)

STEP #1:
To add new events below, provide an **Event Name** for that event, and then click the [Add new event](#). Once events have been added, you can easily change their order by dragging and dropping the event using the up-down arrow icon on the far left for a given row in the table.

STEP #2:
Once you have defined your events on this page, you may navigate to the [Designate Instruments for My Events](#) page, where you may select which data collection instruments that you wish to utilize for each event you defined.

[Upload or download arms/events](#)

	Event #	Event Name	Custom Event Label <small>(optional)</small>	Unique event name <small>(auto-generated)</small>
	1	Baseline		baseline_arm_1
	2	Follow-up 3 Months		followup_3_months_arm_1
	3	Follow-up 6 Months		followup_6_months_arm_1

Arm name: **Arm 1** [+Add New Arm](#) [Rename Arm 1](#)

Step 3: Designate Instruments

Project Setup Define My Events Designate Instruments for My Events

Since you have defined multiple events on the [Define My Events](#) page, you may now select which data collection instruments that you wish to utilize for each event by using the table below. This allows you to enter data on any data collection form multiple times for any given project record. Any and all data collection instruments can thus be used for any event defined.

Click the [Begin Editing](#) button to change the relationships below by designating which forms you wish to utilize for which events. When you are finished making changes, click the [Save](#) button to finalize your changes.

[Upload or download instrument mappings](#)

Data Collection Instrument	Baseline (1)	Follow-up 3 Months (2)	Follow-up 6 Months (3)
Demographics	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Diagnosis	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Simple Questions	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Begin Editing Save Select All | Deselect All

MONASH University

Step 4: Enable optional Modules/Customisations

Complete!  Define your events and designate instruments for them

Create events for re-using data collection instruments and/or set up scheduling.
Go to [Define My Events](#) or [Designate Instruments for My Events](#)

Not complete?

Optional 

Enable optional modules and customizations

- Repeatable Instruments and events [?](#)
- Auto-numbering for records [?](#)
- Scheduling module (longitudinal only) [?](#)
- Randomization module [?](#)
- Designate an email field for sending survey invitations [?](#)

I'm done!

Additional customizations

Step 4: Enable optional Modules/Customisations

Make additional customizations to your project

You may use the options below to make customizations to the project. When done, click Save to save your changes.

 **Set a custom record label**
You may append other data and/or static text to any record name (e.g., Study ID) as the record is displayed on your data collection instruments, such as inside the drop-down lists when choosing a record and at the top of the page after being selected. Simply provide the text you wish to display below, and place any variable names inside square brackets [], after which the data collected for those variables for that record will replace the variable in the text. **NOTE:** Since multiple events are defined for this project (i.e. it is longitudinal), you must prepend the unique event name to the variable name in brackets - e.g., [baseline_arm_1][last_name]. Smart Variables can also be used here - e.g., [first-event-name][last_name].

Custom record label:

Example: if ([last_name], [first_name]) where entered, then for record '102' it would display '102 (Doe, John)'.

 **Define a secondary unique field**
Specify a field as your secondary unique field, whose value will be displayed next to the record name when selecting or viewing records/responses in order to more easily identify a record/response. When entering data for the secondary unique field on a form or survey, its value will be checked in real time to ensure it does not duplicate the value from another record. Only 'text' fields may be used. **NOTE:** Since multiple events are defined for this project (i.e. it is longitudinal), the data will only be pulled from the first Event of the currently selected Arm.

email - Email

 MONASH University

Step 6: User Rights and Permissions

The screenshot shows the REDCap project dashboard. On the left, there's a sidebar with links like 'Record Status Dashboard', 'Add / Edit Records', 'Applications' (which includes 'User Rights'), and 'Project Bookmarks'. The main area has two sections: 'Set up project bookmarks (optional)' and 'User Rights and Permissions'. The 'User Rights and Permissions' section is highlighted with a red box around the 'User Rights' button. The MONASH University logo is in the bottom right corner.

Step 6: User Role

This screenshot shows the 'User Rights' page. At the top, there are tabs for 'Project Home', 'Project Setup', 'User Rights' (which is selected), and 'Data Access Groups'. Below the tabs, there's a section for 'Add new users' and another for 'Create new roles'. A red arrow points from the 'Create new roles' section to the 'Create role' button. Below these sections is a table listing user roles with their assigned privileges. The MONASH University logo is in the bottom right corner.

Role name (click role name to edit role)	Username or users assigned to a role (click username to edit or assign to role)	Expiration (click expiration to edit)	Project Design and Setup	User Rights	Data Access Groups	Data Export Tool	Reports & Report Builder	Graphical Data View & Stats
—	johnl (John Limar)	never	✓	✓	✓	Full Data Set	✓	✓
Data Collector	[No users assigned]		✗	✗	✗	✗	✓	✓
Project Manager	[No users assigned]		✓	✓	✓	Full Data Set	✓	✓

Step 6: User Role

This page may be used for granting users access to this project and for managing the user privileges of those users. You may also create roles to which you may assign users (optional). User roles are useful when you will have several users with the same privileges because they allow you to easily add many users to a role in a much faster manner than setting their user privileges individually. Roles are also a nice way to categorize users within a project. In the box below you may add/assign users or create new roles, and the table at the bottom allows you to make modifications to any existing user or role in the project, as well as view a glimpse of their user privileges.

Add new users: Give them custom user rights or assign them to a role.

— OR —

Create new roles: Add new user roles to which users may be assigned.

(e.g., Project Manager, Data Entry Person)

Bad practice: Assign user without a role

Best practice: Always create role and assign user to the role

Role name (click role name to edit role)	Username or users assigned to a role (click username to edit or assign to role)	Expiration (click expiration to edit)	Project Design and Setup	User Rights	Data Access Groups	Data Export Tool	Reports & Report Builder	Graphical Data View & Stats
—	johnl (John Liman)	never	✓	✓	✓	Full Data Set	✓	✓
Data Collector	[No users assigned]		✗	✗	✗	✗	✓	✓
Project Manager	[No users assigned]		✓	✓	✓	Full Data Set	✓	✓

MONASH University

Step 6: Assign User to Role

Add new users: Give them custom user rights or assign them to a role.

— OR —

Create new roles: Add new user roles to which users may be assigned.

(e.g., Project Manager, Data Entry Person)

User must exist – if not exist raise a request

Role name (click role name to edit role)	Username or users assigned to a role (click username to edit or assign to role)	Expiration (click expiration to edit)	Project Design and Setup	User Rights	Data Access Groups	Data Export Tool	Reports & Report Builder	Graphical Data View & Stats
—	johnl (John Liman)	never	✓	✓	✓	Full Data Set	✓	✓
Data Collector	[No users assigned]		✗	✗	✗	✗	✓	✓
Project Manager	[No users assigned]		✓	✓	✓	Full Data Set	✓	✓

MONASH University

Step 6: Data Access Groups

OR

Step 6: Data Access Group

Data Access Groups	Users in group	Number of records in group	Unique group name (auto-generated)	Group ID number	Delete group?
Alfred Hospital		0	alfred_hospital	1	X
Cabrini Hospital		0	cabrini_hospital	2	X
Royal Melbourne Hospital		0	royal_melbourne_ho	3	X
St Vincent Hospital		0	st_vincent_hospita	4	X
[Not assigned to a group]	johnl (John Liman) * Can view All records	1			

Step 7: Test Your Project

Complete!

[Not complete?](#)

Test your project thoroughly

It is important to test the essential components of your project before moving it into production. Try creating a few test records and entering some data for each to ensure that your data collection instruments look and behave how you expect, especially branching logic and calculations. Then review your test data by creating reports and exporting your data to view in Excel or a statistical analysis package. If you have surveys, complete the surveys as if you were a participant by using the Public Survey Link or Participant List by sending a survey invitation to yourself. If other project modules will be used regularly, test them out a bit too. The best way to test your project is to use it as if you were entering real production data, and it is always helpful to have colleagues (especially team members) take a look at your project to get a fresh set of eyes looking at it.

Step 8: Move to Production

Not started

Move your project to production status

Move the project to production status so that real data may be collected. Once in production, you will not be able to edit the project fields in real time anymore. However, you can make edits in Draft Mode, which will then need to be approved by a REDCap administrator before taking effect.

Go to [Move project to production](#)

Move Project To Production Status?

Are you sure you wish to leave the DEVELOPMENT stage? If you proceed, the project will be moved to PRODUCTION status so that real data may be collected. If you select the 'Delete ALL data' option below, all current collected data, calendar events, and uploaded documents will be deleted; otherwise all will remain untouched as the project is moved to production.

★ Have you checked the [Check For Identifiers](#) page to ensure all identifier fields have been tagged?

Keep existing data or delete?

- Keep ALL data saved so far.
- Delete ALL data, calendar events, documents uploaded for records/responses, survey responses (if applicable), and any logging events pertaining to data collection.

Once in production, you will not be able to edit the project fields in real time anymore. However, you can make edits in Draft Mode, which will be auto-approved or else might need to be approved by a REDCap administrator before taking effect.

[YES, Move to Production Status](#)

[How to use Piping here](#)

Public Survey Link

Manage Survey Participants

[Public Survey Link](#) [Participant List](#) [Survey Invitation Log](#)

Using a public survey link is the simplest and fastest way to collect responses for your survey. You may obtain the survey link below to email it to your participants. Responses will be collected anonymously (unless the survey contains questions asking for identifying data from the participant). **NOTE:** Since this method uses a single survey link for all participants, it allows for the possibility of participants taking the survey multiple times, which may be necessary in some cases.

Public Survey not set up yet!

The public survey has not been set up yet, so a public survey link cannot be displayed here. A public survey is when the first instrument in your project has been enabled as a survey. If you wish to enable a public survey, you may click the button below, after which you will be able to obtain your public survey link and utilize the Participant List for the public survey.

[Enable public survey](#)

Participant List

Manage Survey Participants

[Public Survey Link](#) [Participant List](#) [Survey Invitation Log](#)

The Participant List option allows you to **send a customized email** to anyone in your list and **track who responds to your survey**. It is also possible to identify an individual's survey answers, if desired, by providing an Identifier for each participant (this feature must first be enabled by clicking the 'Enable' button in the table below). [More details](#)

Data Exports

Data Exports, Reports, and Stats

This module allows you to easily view reports of your data, inspect plots and descriptive statistics of your data, as well as export your data to Microsoft Excel, SAS, Stata, R, or SPSS for analysis (if you have such privileges). If you wish to export your *entire* data set or view it as a report, then Report A is the best and quickest way. However, if you want to view or export data from only specific instruments (or events) on the fly, then Report B is the best choice. You may also create your own custom reports below (if you have such privileges) in which you can filter the report to specific fields, records, or events using a vast array of filtering tools to make sure you get the exact data you want. Once you have created a report, you may view it as a webpage, export it out of REDCap in a specified format (Excel, SAS, Stata, SPSS, R), or view the plots and descriptive statistics for that report.

Report name	View/Export Options	Management Options	Report ID (auto-generated)
A All data (all records and fields)	View Report Export Data Stats & Charts		
B Selected instruments and/or events (all records)	Make custom selections		
+ Create New Report			

MONASH University

Create New Reports

Data Exports, Reports, and Stats

You may create a new report by selecting the fields/variables below that you want to include in the report. You may add as many fields to your report as you wish, and you can choose which users may view this report. You will also need to provide a name for your report, which will then be displayed on the project's left-hand menu for anyone to whom you have given access. You can filter the results returned in the report in a variety of ways, including using complex AND/OR logic. When you are finished, click the Save button at the bottom. The new report will then be added to your list of reports, after which you may immediately begin viewing them or exporting them.

STEP 1

User Access: Choose who sees this report on their left-hand project menu [?](#)

All users - OR - Custom user access (Choose specific users, roles, or data access groups who will have access)

STEP 2

Fields to include in report

Field	Value	Instrument	Remove
Field 1	record_id "Record ID"	Instrument: Demographics	X
Field 2	first_name "First Name"	Instrument: Demographics	X
Field 3	last_name "Last Name"	Instrument: Demographics	X
Field 4	dob "DOB"	Instrument: Demographics	X

MONASH University

Create New Reports

STEP 3

Show data for all events for each record returned [?](#) [How to use filters and AND/OR logic](#)

Filters (optional)

Filter 1 demographics_complete "Complete?" = Complete **Operator / Value**

Filter 2 -- select a field -- **Operator / Value**

AND

Live Filters (optional) Live Filters can be selected on the report page for dynamically filtering data in real time. Only multiple choice fields can be used as Live Filters (as well as Events, if longitudinal, and Data Access Groups, if any exist).

Live Filter 1 [Data Access Groups] **Live Filter 2** -- select a field -- **Live Filter 3** -- select a field --

STEP 4

Order the Results (optional)

First by record_id "Record ID" Ascending order

Then by Type variable name or field label Ascending order

Then by Type variable name or field label Ascending order

Data Dictionary Codebook

The screenshot shows the REDCap Project Home interface. At the top, there are four navigation buttons: 'Project Home', 'Project Setup', 'Other Functionality', and 'Project Revision History'. Below these is a 'Quick Tasks' section. A red box highlights the 'Codebook' button, which is described as a human-readable, read-only version of the project's Data Dictionary. Other buttons in the 'Quick Tasks' section include 'Export data', 'Create a report', 'Check data quality', 'User Rights', 'Online Designer and Data Dictionary Upload', 'Copy this project', and 'Data Access Groups'. To the right of the 'Codebook' button, there is a note stating 'Project is not used as a template' with an 'Add' button. The bottom of the screen features a blue decorative bar with the Monash University logo.

The screenshot shows the 'Data Dictionary Codebook' page. At the top, there are three navigation buttons: 'Project Home', 'Project Setup', and 'Codebook'. Below these is a detailed description of the Codebook, noting it is a human-readable, read-only version of the Data Dictionary and serves as a quick reference for viewing field attributes. It also mentions that checkbox fields have their coded values displayed both in the format defined by users in the Online Designer/Data Dictionary as well as in the extended format seen in data imports and exports (i.e., field_code). There is a 'Print page' button and a 'Data Dictionary Codebook' title. The main content is a table titled 'Instrument: Demographics (demographics)'. The table has columns for '#', 'Variable / Field Name', 'Field Label', and 'Field Attributes (Field Type, Validation, Choices, Calculations)'. The table rows are:

#	Variable / Field Name	Field Label	Field Attributes (Field Type, Validation, Choices, Calculations)				
1	record_id	Record ID	text				
2	first_name	First Name	text, Required, Identifier				
3	last_name	Last Name	text, Required, Identifier				
4	dob	DOB	text (date_dmy), Required, Identifier				
5	gender	Gender	radio, Required, Identifier <table border="1"> <tr><td>1</td><td>Male</td></tr> <tr><td>0</td><td>Female</td></tr> </table>	1	Male	0	Female
1	Male						
0	Female						
6	email	Email	text (email), Required, Identifier				

Data Import

Tips

- Perform All Data Export (raw data) and take a look on how it was structured
- Empty columns can be removed from the import file
- Always perform Data Quality check after import (next topic)

Data Import Tool

This module may be used for importing data into this project from a CSV (comma delimited) file or alternatively from an XML file in CDISC ODM format. Below are the steps you will need to follow in order to import your data successfully into this project.

NOTICE:
This project is currently in Development status. **Real data should NOT be entered** until the project has been moved to Production status.

CSV import **CDISC ODM (XML) import**

Instructions:

- 1.) Click the link below to download your data import template as a CSV (comma delimited) file. Save it locally to your computer and then open it to begin filling it with the data you wish to import.
[Download your Data Import Template \(with records in rows\)](#) ↗
OR
[Download your Data Import Template \(with records in columns\)](#)
- 2.) In each column of the Data Import Template file that you downloaded, place the data for each record that you wish to import. Once all your data has been added, save the file.
 - Be sure not to change the Variables/Field Names in the file or an error may occur.
 - Also, for all of the 'dropdown' or 'radio' fields in the project, you must make sure that the numerical value (rather than the text value) is entered in those cells, or else it cannot be processed.
 - Any empty rows or columns in the file can be safely deleted before importing the file. Doing this reduces the upload processing time, especially for large projects.
- 3.) Click the 'Browse' or 'Choose File' button below to select the file on your computer, and upload it by clicking the 'Upload File' button.

Data Import

Sample File

	A	B	C	D	E	F	G	H	I
1	record_id	redcap_event_name	redcap_data_access_group	first_name	last_name	dob	gender	email	demographics_complete
2	1	baseline_arm_1	alfred_hospital	Kenny	Rogers	31/01/1990	1	Kenny.Rogers@monash.edu	2
3	2	baseline_arm_1	cabrini_hospital	John	Doe	10/10/1980	1	John.Doe@monash.edu	2
4	3	baseline_arm_1	royal_melbourne_ho	Kelly	Hillman	11/12/2000	0	Kelly.Hillman@monash.edu	2
5	4	baseline_arm_1	st_vincent_hospita	Christpoher	Mace	15/02/1989	1	Christpoher.Mace@monash.edu	2
6	5	baseline_arm_1		Michelle	Pullman	5/05/1977	0	Michelle.Pullman@monash.edu	2

Data Import

How to assign records to Data Access Groups:

Since this project has Data Access Groups and since you are not in a group, you are able to assign or re-assign records to groups. You may assign records to groups by utilizing the 'redcap_data_access_group' field in your data import file, in which you will provide a **unique group name** for each record. A list of all the unique names for each Data Access Group are listed on the [Data Access Groups](#) page.

How to import records for events:

In order to import records for longitudinal projects such as this one, you must use the 'redcap_event_name' field in your data import file, in which you will provide a **unique event name** for each record. This will tell it which event that the data belongs to for that record. A list of all the unique names are listed on the [Define My Events](#) page. If the 'redcap_event_name' field is not specified for every record being imported, it will display an error.

Record format: The file to be uploaded has its records stored as separate

Format for date and datetime values: DD/MM/YYYY or YYYY-MM-DD

Allow blank values to overwrite existing saved values? No, ignore blank values in the file (default)

Name the imported records automatically (force record auto-numbering) No, use the record name provided

Upload your CSV file:
 None chosen

Data Quality

Data Quality

This module will allow you to execute data quality rules upon your project data to check for discrepancies in your data. Listed below are some pre-defined data rules that you may utilize and run. You may also create your own rules or edit, delete, or reorder the rules you have already created. To find discrepancies for a given rule, simply click the Execute button next to it, or click the Execute All Rules button to fire all the rules at once. It will provide you with a total number of discrepancies found for each rule and will allow you to view the details of those discrepancies by clicking the View link next to each. [Read more detailed instructions.](#)

Rule #	Rule Name	Rule Logic (Show discrepancy only if...)	Real-time execution ?	Total Discrepancies	Alfred Hospital	Cabrini Hospital	Royal Melbourne Hospital
A	Missing values*	-		Execute			
B	Missing values* (required fields only)	-		Execute			
C	Field validation errors (incorrect data type)	-		Execute			
D	Field validation errors (out of range)	-		Execute			
E	Outliers for numerical fields (numbers, integers, sliders, calc fields)**	-		Execute			
F	Hidden fields that contain values***	-		Execute			
G	Multiple choice fields with invalid values	-		Execute			
H	Incorrect values for calculated fields	-		Execute			

Data Quality

Date of birth must not be greater than today's date

Add Enter descriptive name for new rule (e.g., Participants below age 18)

datediff([dob],"today","d",true) < 0

Valid Enter logic for new rule (e.g., [age] < 18)
How do I use special functions?

Execute in real time on data entry forms ?

WARNING: Data Quality rules were violated!

The Data Quality rules listed below were found to have discrepancies for this record. Review the table below to see which rules were violated so that the data values for the fields involved can be corrected, if necessary. You may exclude a result in the table by clicking the 'exclude' link on the right side, after which that rule will no longer be displayed for this record whenever the record is saved.

Rule(s) violated	Fields involved	Exclude [link]
Rule #1: Date of birth must not be greater than today's date datediff([dob],"today","d",true) < 0	dob: 03-10-2018	exclude

REDCap Citation

Study data were collected and managed using REDCap electronic data capture tools hosted and managed by Helix (Monash University).

¹REDCap (Research Electronic Data Capture) is a secure, web-based application designed to support data capture for research studies, providing 1) an intuitive interface for validated data entry; 2) audit trails for tracking data manipulation and export procedures; 3) automated export procedures for seamless data downloads to common statistical packages; and 4) procedures for importing data from external sources.

¹Paul A. Harris, Robert Taylor, Robert Thielke, Jonathon Payne, Nathaniel Gonzalez, Jose G. Conde, Research electronic data capture (REDCap) - A metadata-driven methodology and workflow process for providing translational research informatics support, *J Biomed Inform.* 2009 Apr;42(2):377-81.

DESIGNING AND USING SURVEYS AND QUESTIONNAIRES IN HEALTHCARE

28–29 November 2019

This two day course will introduce participants to the theories, concepts and practice of developing and using surveys in clinical research and practice.

TOPICS INCLUDE

DAY 1

- Using surveys
- Designing and writing good survey questions
- Ethical considerations when collecting data using surveys
- Recruitment and data collection
- Data entry and data coding

DAY 2

- Implementing surveys into practice
- Managing and analysing survey data
- Title of surveys
- Troubleshooting your survey

Students may register for one or both days

WHO SHOULD ATTEND?

- Health care providers (medical, nursing and allied health staff)
- Public service researchers
- Policy makers and program managers
- Quality managers
- UoM students (e.g. PhD or Masters students)
- Teaching associates and academics

DATE
28–29 November 2019

TIME
9 am – 4.30pm

VENUE
Conference rooms 1 & 2
553 St Kilda Road
Melbourne Vic 3004

CONVENORS
Dr Sze-Ea Soh
Dr Renata Morello
Dr Darshini Ayton
A/Prof Ilana Ackerman

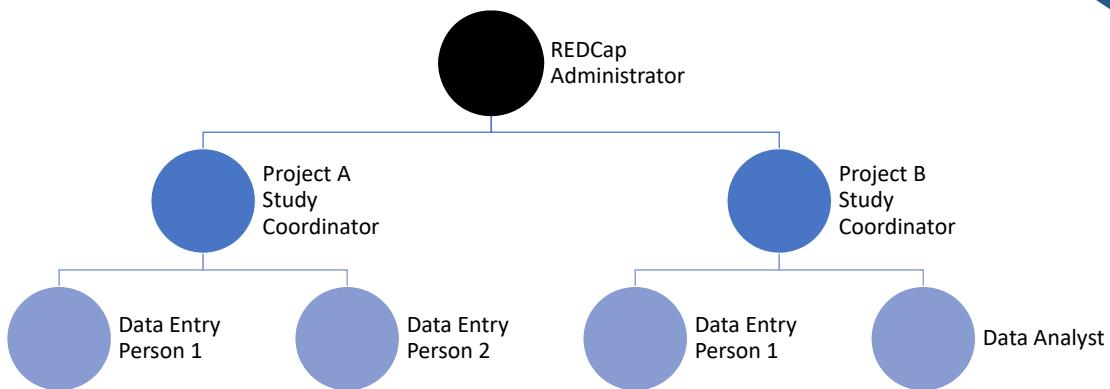

COURSE FEE
\$480 (incl. GST) per day
Students may register for 1 or 2 days

ENQUIRIES
If you have registration queries please contact the Short Course Office on:
T +61 3 9903 0693
E shortcourses.dept@monash.edu
